Alaska's largest accessible glacier. About 10,000 years ago, the Matanuska Glacier began to retreat to its present position, and has not changed significantly in nearly two decades. Due to the geomorphological characteristics of the valley glaciers, the Matanuska Glacier is ideal for many glacier hikers due to its geomorphological characteristics, which make it more prone to sunny weather in winter than in the surrounding area. And this area is one of the most spectacular and breathtaking in Alaska because of the addition of glaciers and sheep mountains. We will enjoy a glacier walking experience (about 2 hours) led by a professional guide. (Please prepare warm

down jacket, velvet jacket, hat, scarf, anti-ski boots, sunglasses, etc. Free walking equipment, such as helmets and non-slip shoe chains, will be provided.)
